

THE CHRONICLE

VOL. XI. NO. 24.

CROSSFIELD, ALBERTA. FRIDAY, JUNE 21st, 1918.

PRICE \$1.50 A YEAR.

WM. LAUT

**Best Investment
a COW OWNER
CAN MAKE**

THAT'S what over two million cow owners the world over have found, the De Laval Cream Separator to be.

A De Laval Separator saves butter-fat and produces cream of superior quality over any setting system or any other separator every time it is used, twice a day every day in the year.

It involves far less labor than any setting system, has greater capacity, runs easier and lasts from two to ten times longer than any other separator.

Even if you have only two or three cows, if you are selling cream or making butter, a De Laval Cream Separator is the most profitable investment you can make.

If you are using any other cream separator it will certainly pay you to try a De Laval alongside your present machine and see how much cleaner you can skim with a De Laval, and also how much easier it is to run and keep clean and sanitary.

When you consider that a De Laval Separator usually saves its cost the first year and frequently in a few months, and then goes right on doing so for from ten to twenty years, and it is further understood that the De Laval may be purchased on such terms that it will actually pay for itself while you are using it, it can easily be seen that there is no excuse for any one putting off the purchase of this great cream-saving machine.

Money to Loan.

Local and General :

A full report of the awards in connection with Crossfield Fair will be given in our next issue.

Miss M. Creighton, of Calgary, was a visitor to town on Monday last.

The pigs in connection with the Crossfield Boy's and Girls' Pig Club were distributed to the members during the week. The pigs looked to be a lot of young healthy sows.

CHURCH OF THE ASCENSION.
4th Sunday after Trinity, June 23.
10 a.m. Sunday School.

11 a.m. Morning Prayer and Holy Communion.

Pte. Jas. Robinson, who it will be remembered left here with the 187th Batt., returned home on Wednesday last. Pte. Robinson was struck with a piece of flying shrapnel which penetrated his right arm also going into his side. It was during the severe fighting which took place around Lens that Robinson received his injuries, he carries the innocent looking piece of shrapnel, which was the cause of his home coming in a case in his vest pocket as a memento.

Wanted.—To lease some good Hay Land, or will buy one year's crop on ground. Apply L. V. Bliss, Crossfield.

CHAS. HULTGREN, Crossfield

HERE IS THE DAY YOU REGISTER

ON June 22nd, Saturday, every man and woman, resident in Canada, who is 16 years and over, must attend at one of the places provided for registration, between the hours of 7 a.m. and 10 p.m., and there truthfully answer all the questions set forth upon the registration card. Upon signing the card, vouching for the accuracy of the answers, the man or woman will receive a Registration Certificate, as shown below, which must be carried upon the person thereafter.

Why the Certificate is so Important

For failure to register a maximum fine of \$100 and one month's imprisonment is provided, also an added penalty of \$10 for each day the person remains unregistered after June 22nd.

Persons remaining unregistered cannot lawfully be employed, and cannot draw wages for work done after June 22nd. Employers who keep unregistered persons in their employ will be liable for fines equal in amount to those recoverable from the unregistered employees.

Unregistered persons cannot lawfully purchase transportation tickets, and may find themselves

barred from travelling on railroads, steamboats, etc. Similarly they may be denied board and lodging at any hotel, restaurant, public house or boarding house.

In a word—All persons remaining unregistered, and all persons having dealings with unregistered persons, knowing them to be such, incur heavy penalties under the law.

**REGISTRATION IS LAW—
Don't Fail to Register.**

**This Certificate is
YOUR Protection.
Get it and Carry it**

Every inch of farm, garden, and allotment must do its utmost to beat the Kaiser. Dig your ground, compare the soil, sow your seeds, till your plants with a will for Victory and allied peace. Privates "Spud," parsnip, onion, carrot, leek, turnip, bean, cabbage, marrow, are waited for armies, billions strong, to take the great offensive in the food fight. The man who uses his spade and sows patriotism is befriending the mother with the gun and bayonet. He risks his life that you may live unmolested—Remember this when you dig!—From the British Ministry of Food.

A New Weapon

The Phantom Ship That Haunts the Submarine

M. A. Rousseau, the naval critic of the Temps, who has returned to Paris from visiting the same ship, has been permitted by the imprimatur of the British admiralty to give French readers the first description of the famous "Hush, Hush" boats, about which, as regards their characteristics, the authorities have succeeded in maintaining lithetno profound secrecy.

We were passing, writes M. Rousseau, in front of ships of unusual aspect, specially constructed craft for war purposes—monitors, cruisers and the like. Certain of these vessels caught our attention, especially by their outline and dimensions. They were very long, with immense decks fore and aft. They appeared to lie low on the water. Perhaps this was an optical effect produced by their length. They have two tripod masts, the first of which carries tops apparently armed, and in the middle of the vessel rises a very squat central castle, at the extremities of which are the heavy artillery turrets—turrets for two guns of the big artillery, the calibre of which is the same on all vessels of the same type, is at the limit of the average and small artillery. The stem of these craft is tapered more like the stern of a yacht than that of a battleship; it is not perpendicular, but curving inwards; to use the nautical phrase, it is "cut-water." The shape of the stem has certainly been determined in order to realize the same speed, and, as a matter of fact, these vessels are very swift, much faster than the fleetest of the present day.

These craft—we may call them battle cruisers—are of two types, or, rather, of two dimensions, the two elements of power are, we believe, the same, except as regards protection. As for speed, they are the same as the small as on the big craft, the radius of action having to be the same, and the same as regards gunnery, in gummber, is the same as regards the calibre of the principal and secondary armaments.

These vessels have been created since the war, I say created, because it was stated to me that they were inspired by the lessons of the war. They were begun in 1915, and have been twelve months in service. The admirable results of the organization of labor in the British dockyards, I know not whether they have all been built in private yards, but the most important of those actually aloft, the "Hush, Hush" boats, are commanded by Capt. Michael Godfrey, formerly naval attaché at the British embassy in Paris, was turned out by private industry. Other vessels, however, are under construction, their dimensions being yet more considerable.

We were receiving on board one of these vessels on one, the smaller, the "Hush, Hush" boat, which was as we went through the officers' quarters, I was struck by the fact that two officers were playing billiards. True, the ship was at anchor and in a restricted area, but it is possible, but it is my opinion that it must have fine qualities of stability to have on board a billiard table.

On the second, the "Hush, Hush" boat, the captain invited us to lunch, and afterwards we visited the fighting quarters—blockhouse, turret-out station for submarines, a look-out for its enormous guns with a range of a minute and which, according to the Germans, weigh 36 tons and throw a 885-kilo (1,947 lb.) shell.

Everything is organized to have the control in one and the same hand, and the layout of the ship is the same. The system invented by Admiral Sir Percy Scott a few years ago has made great progress. The heavy artillery and the secondary armaments are no longer autonomous; everything acts in the same direction, and if the guns have a fuse fired in the turret itself, they have another electric one operated from a central station. It is a truly remarkable system and one which, beyond all doubt, has produced highly satisfactory results. Its installation on the new ships shows that it has stood the test.

England is building many submarines, but the development of this new weapon has not affected the theories which have been the naval power of our allies, and this is proved by the new building program, which are the outcome of experience, —Boston Transcript.

British Columbia Spruce

Production of spruce in British Columbia for aeroplane purposes is being achieved on a large scale. This activity will continue until the end of the war and will mean a large increase in the value of timber produced, probably bringing the price of this business for 1918 into first place again among British Columbia's industries.

Jack (pushing into papa's room)—"Papa, the coffee pot and the kettle are singing."

Papa—"Nothing strange about that."

Jack—"But they are singing for a wagger."

Papa—"Nonsense! They can't sing."

Jack—"How?"

Papa—"Because the frying pan is in the middle hanging stakes!"

Watch It

A form of government may be judged from the nature of the revolutions it provokes.—Zarathustra.

Food Saving in the Home

SPLENDID EXAMPLE OF CANADIAN WOMEN

MRS. MARTIN BURRELL

"If all the women of Canada realized the danger of famine, they would not waste—neither would they want to in the future. No one has ever before they must produce, and again produce. They must save with all their might. There was never a time when they had a better chance to do great work than now, and their service lies in field and kitchen."—Mrs. Martin Burrell.

"Waste not—want not." It was one of the first things I learned in life. In England people are brought up not to waste a crumb. They can see so many of the poor around them that they realize the seriousness of waste. I know at our own home we had regular pensioners who called every day for food."

The wife of the secretary of state, Mrs. Martin Burrell, believes firmly in the good old-fashioned doctrine of thrift. She thinks the present generation has fallen away from the careful, economical ways of the mothers and grandmothers who spent most of their time within the four walls of their homes, spinning and cooking and attending to the general work of the household.

"I'm glad I'm not the food controller," observed Mrs. Burrell, when asked what she thought about the question of food conservation. "It's a thankless task at best. No matter what the intentions as they may be, sure to be misconstrued when he has to dictate to the people at large, and especially when it is in regard to what they must eat. It's always a hard matter to say what another person should do, for each one has his own problems. However, I think that the people of Canada are beginning to take the 'waste not' motto to heart."

Mrs. Burrell does not believe much in hard and fast rules for the whole community, such as would be necessary were compulsory rationing introduced. She believes that everyone should do his utmost in saving, according to his circumstances. "There are a great many luxuries in use, which we think of almost as necessities, that we could easily do without—candies and sweets of all kinds for instance," said Mrs. Burrell. "We need a certain amount of sugar, but nothing like the quantities commonly used. Of course, it is easy for one person to say: 'Why don't you do this?' and 'Why don't you do that?' But each individual has to decide for himself what he shall do."

"We are a small family and there is no waste where we are concerned. I make a point of using as little meat as possible, and we substitute fish and eggs wherever we can. I think it is a most excellent thing that the flour has been standardized. It will make it much easier for people to conserve when they know they cannot pick and choose but must use a uniform brand. It surprises me that more use is not made of rye flour. It makes excellent cake. In fact, you can scarcely distinguish it from the other."

"It seems to me that the finest thing the women of 1918, who really want to help her country, can do is to go out and assist in the production of food. She can do what she will, and every little helps."

Mrs. Burrell proceeded to tell of the women's members of the Women's Canadian Club in Ottawa last year. Personally, she had charge of about a dozen who were gardened at Rockcliffe, and did it so successfully that they made nearly \$300 of food. They had for about one and three-quarter acres, and they grew beans, peas, corn, tomatoes, potatoes, etc.

"If I think if every vacant lot were planted with potatoes and other vegetables, and the women cared for them, they would be rendering a national service. The assistance of everyone counts. I am particularly in favor of women going on the farms and assisting either the farmer or his wife. The women of England are doing almost every kind of work on the farm, and they, along with the women of France, have shown that they are as capable in this respect as men. There are many women out West who could drive hay-racks and tractors, and in almost any part of Canada women could look after poultry and dairy produce."

Mrs. Burrell, who has lived for years in British Columbia, proceeded to tell of women who are taking the place of their soldier husbands and are running the farms themselves. So many men have gone in some districts that either the farms have been shut down or the women are doing almost every kind of work on the farm, and they, along with the women of France, have shown that they are as capable in this respect as men. There are many women out West who could drive hay-racks and tractors, and in almost any part of Canada women could look after poultry and dairy produce."

Preparing the Soil

Some Sage Advice for Gardeners to Follow

The preparation of the soil before planting is very important to success in growing nearly all crops. This is where many of our gardeners fail. We get in a hurry and then plow and harrow and think we have everything ready for the seeds. There may be enough trash in the soil that has been turned under to hold the top up from the bottom, or subsoil, to an extent that will cause rapid drying. This will not show up much on the surface but it will soon show up in the growth of the crop. We may have plowed when the soil was too wet and have a cloddy mass that will be ruined for good crop production for a year or two. We may have the soil so dry and loose when the seeds are planted that they will start to germinate and die before they can reach the air. These conditions are very common, but they should not be so, for the preparation of the seed bed is half the battle.

A deep, rich, mellow soil is the ideal garden spot, and this should be plowed when it is in the right condition, possible, and never when it is too wet enough so it will pack into a ball that cannot be shattered by a tap with the finger. If it is so wet that we can make a mud ball of it, or one that will not pulverize by a sharp rap, it will be packed by the plow, and packed again when harrowing is done, and the roots will have to penetrate the soil that has the consistency of bricks. Plants will not attempt such a job. On the other hand the soil must not be left so loose that it dries rapidly. A heavy roller is the best thing to firm the soil with, but repeated harrowings will do it pretty well. I have used a drag made by lapping two planks a foot wide so one lay a couple of inches over the other and held the ends by a cleat at each end on top. As both planks sloped downward and backward, the soil was pressed down as well as being pulverized, and when the harrow was run over this to loosen up the surface it was in a very satisfactory seed bed. The soil for several inches down was well firmed, and the loose surface helped to keep the moisture below. The seeds were planted and the moisture in the soil that was turned kept them moist enough to come up even if the weather was pretty dry. I have had seeds germinate on soil that was so loose that the same kind of seeds planted the same way on soil just harrowed failed to germinate at all.

Gardens can hardly be made too rich, but it is necessary that the manure be well rotted. It shows little bare when turned up by the plow. It will not cause the garden to dry out badly as well as to cause much trouble with the cultivators. It is impossible to get soil moist enough to plant the seeds in the manure is only partially rotted and will not pulverize. I used the manure from my horse's yard every year when I gardened, and it was left in the beds until winter and then scattered. It was very well rotted, and left no trace of the manure in evidence.

Where gardens are made very rich from frequent manuring it will pay to use lime fairly freely, for it will make the manure more effective. I have had people complain that they made their gardens too rich, but I never saw an idea of making them sour, for I used manure heavily on mine and never saw any bad effects, and much crop had from the garden every season was very fairly good. —C. H. in Successful Farming.

Shortage of Water

Hardships Experienced by the British Forces in Palestine

Some of the hardships experienced by the British forces in Palestine are described in a letter received by a friend in Montreal from a priest. The letter, written shortly before the fall of Jerusalem, tells of a day early in November when a camel convoy from Beersheba was unable to reach the men then fighting for the deliverance of the Holy City from the Turks.

"There was a hot wind blowing," wrote the priest. "A lumber full of water was left in my bottle which I divided between four officers whose lives were split and covered with a green slime. That afternoon I had a burial service, and literally I could not articulate without keeping my mouth to my hand, and pulling my lower lip off my teeth, while bullets from a concealed sniper whizzed about my head, and again and again in enough to give each one a bottle—quite inadequate."

The school teacher had punished Tommy so often for talking during school and the punishments had been so severe that he had decided to tell his father of his son's fault.

"Tommy talks a great deal," in due course of time he returned with his father's signature and under it was written: "You ought to hear his mother."

Developing the Wool Industry

Outcome of a Movement for More and Better Wool

A movement which will probably have a most important bearing on the future of the sheep industry in Canada has just been set on foot. It is the formation of the Canadian Co-operative Wool Growers Limited. This association is the outcome of a movement for more and better wool which has been very successful during recent years. Particularly in Western Canada, the results have been very gratifying. Although the country is admirably suited for sheep raising, the prices of the wool obtained for their wool did not offer a great inducement for the industry to be taken up generally. It was not because the quality of the wool was inferior to that grown in other countries, but the demand for it was not satisfactory. It was simply a question of marketing and preparation for market. Up to a few years ago all the wool produced in Western Canada was sold on the basis of a flat rate, which gave those engaged in sheep raising no incentive to improve the quality of the wool, and offered no encouragement to others to raise sheep. All this has now been changed, and sheep raising in Western Canada at the present time is one of the most profitable branches of farming that can be followed.

The result is not wholly due to the rise in prices brought about by the wool shortage of wool. It is due mainly to the demand for it. There has been established and the formation of Wool Growers' Associations throughout the country. As a consequence, prices have risen steadily year by year, until last year an average pound of wool fetched a cent and a half more than the price obtained in 1915. Indeed so great was the demand for sheep last fall on the part of the farmers that the wool of Canada that it could only be partly supplied, notwithstanding the enormous quantities of wool sent to sheep to meet the demand.

The new association has been formed in the Dominion of Canada and it has the backing of the Dominion government. Primarily it is a movement to develop the sheep industry generally. It will operate a large wool-raising station in Ontario, whence the wool will be sent for sale, and assembling stations will be set up in the various different provinces. The grower will benefit by the higher prices obtained for his wool, and the wool will be sold in larger lots. In short, the object of the association is to facilitate the wool grower's work to the best advantage of the grower.

British Columbia's Trade

The Year Was a Banner One in the Lumbering Industry

The estimated business of British Columbia during 1917, according to figures compiled by the British Columbia Manufacturers' Association, was more than \$217,000,000. These figures are based not only on the estimates of the lumbering industry, but also on mining, lumbering, farming, etc. The ship building industry was particularly active during 1917, five yards making wooden ships having been added, making a total of 10, and additional yards were capable of building steel vessels. About 7,500 men are employed in ship building.

Throughout the province some seventy-five plants were engaged in the metal trades, occupying about 3,000 men. Fifty-eight new general industrial plants were opened during the year.

The year was a banner one in the lumbering industry, the log scale record being computed from available figures at 1,630,000 feet, and this notwithstanding the adverse local conditions. A feature of this industry is the demand for aeroplane spruce, and it was understood that representatives of the government are authorized to contract for 30,000,000 feet a month. Through lack of tonnage the export trade fell off.

When the lumber industry was in its infancy, tremendous strides have been made in the last two years, and there are now six plants in operation, representing a capital investment of some \$22,000,000.

Last year was a good one for agriculture and the fishing industry.

Crop Rotation

The rotation of crops is not a theoretical proposition, but a practical one, as a scientist has pointed out in all elements of soils and crops, but a systematic and regular method of handling them is necessary. In certain forms 2,000 or more years ago by the Romans. The object of the rotation of crops is to increase the yield per acre of our farm crops without a corresponding increase in the cost of production. The rotation does increase the yields per acre as shown by experiment stations where many crops have been returned with and by the increased production and revenue from farms on which systematic rotations are followed.

What Will You Do For Help?

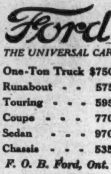

FARM help is scarce, but this condition can be relieved to a marked degree by using machines that accomplish more work in a given time with less man power.

Why should the farmer cling to horses—a slow, expensive means of power—when every other business is adopting the truck and thereby reducing the cost of hauling, speeding up deliveries, and saving for human needs the food that the horses would otherwise consume?

The motor driven truck can work constantly at maximum load under the burning summer sun, or in the coldest winter. Unlike the horse it needs no rests while working, it eats only while in actual use, and when the day's work is done it requires very little attention, and leaves you free for other "Chores" about the place. Then, it can be housed in one-quarter the space of the horses, wagon and harness it replaces.

It is a mistaken idea that a truck is useful only for driving upon paved roads. The Ford can be driven all over the farm, and used for hauling grain, potatoes, fruit, roots, fertilizer, wood, stock, milk or any other product. The speed it travels, the time it saves, and its low upkeep cost appeal very strongly to all users of the Ford Truck. If you need help, order your Ford One Ton Truck today.

All prices subject to war tax charges, except trucks and chassis

Airdrie, Alta.

Court of Revision of M. D. of Rosebud No. 280

The Council of the Municipal District of Rosebud sat as a Court of Revision in Crossfield, June 14th at 11 o'clock a.m. Appeals were read and disposed of as follows: F. Breneman, against half tax, disallowed; no jurisdiction. A. W. Bickle, Hudson Bay Co., Mary McBean, J. D. Lafferty, F. K. McElaish, all those appealed against valuation, and die allowed, equalized. G. Newfield, against grade of land, the Reeve was appointed to investigate and report.

Regular Meeting

The fifth regular meeting of the Council of the Municipal District of Rosebud was held in the Municipal Office in Crossfield on June 14th, 1918.

Present: The Reeve, Deputy Reeve, and Councillors Siebert, Landymore and Huser.

The minutes of the last regular meeting were read and adopted.

Communication from Asst. Director of Surveys read, re lease of road allowance west of section 5, 29, 1, 5. Moved by Councillor Siebert, and carried; that this Council notify the Department that they are agreeable to the lease being granted.

Mr. Thos. Auer of said road allowance Communication from Crossfield and District Agricultural Society asking for a grant was read. Moved by the Reeve: That a grant of one hundred dollars be made to the above society, and that a bye-law be passed confirming the same. Carried.

Legal advice of solicitor J. A. Valliquette, Esq., was read, and it was resolved to follow this advice in paying account in connection with the smallpox case.

The following accounts having been found correct were ordered paid, viz.: A. Jessiman \$64.90, A. Bennett \$7.00, C. Wicks \$13.50, Crossfield Co-op. U.F.A. \$42.50, Alta. Govt. Telephone \$5.50, C.P.R. \$100.00, The Sec.-Treas. \$3.00, M. Thomas \$2.50, Halliday & Co. \$7.45, Cross Nest Pass Lum. Co. \$330.18, Wm. Lamb \$28.55.

The following Day Labor Pay Sheets properly vouchered for were passed and cheques ordered issued, viz.: Division

No. 1 \$738.00, Division No. 2 \$285.00, Division No. 4 \$260.60, Division No. 6 \$25.00.

Moved and carried, that cheque for \$25 be granted for Petty Cash account.

Moved by Councillor Huser, that surveys be asked for roads between 28-26, and 27-28, 28, 29, 28, 4; between 16-17, 20, 28, 4, and between 3 and 4 and 29, 27, 4, and 33-34 28, 27-4.

The council adjourned to meet in Court on July 12th, 1918.

Registration Regulations

The regulations and instructions for the registration of persons over the age of 16 years which takes place on the 22nd of this month have been issued, and we give the following:

Every person who resides in Canada, male or female, British subject or alien, who has attained his or her sixteenth birthday must register at the time and place appointed, and every person who shall attain such age after the day of registration, within thirty days of their birthday, must also register. Persons upon active service in any of His Majesty's military or naval forces so long as they remain upon active service are not required to register.

The registration offices in each district will open at 7 o'clock in the morning and remain open until 10 o'clock at night, and every person must register at the places appointed during these hours.

The penalties for not observing the registration act are a penalty of \$100 and imprisonment up to one month, and a further penalty of \$10 per day for each day after the day when such persons should have registered.

Every person who fails to register will be disqualified to vote at any Dominion election; will forfeit their right and be entitled to obtain or continue in any employment or to receive any salary or wages; they will be disqualified to purchase, receive or have in their possession any railway, steamboat, or other public conveyance ticket; they will be disqualified to board or lodge at any hotel, public house, inn, tavern, club, restaurant or boarding house.

Any person who sells tickets, or harbors any unregistered persons upon his premises after the registration date is liable

to a fine not exceeding \$100.

After the registration every person shall carry their registration certificates upon their person and must produce it upon demand of any peace officer, police officer or constable; and if any person shall, without reasonable excuse, refuse or neglect to produce such certificate he will incur a penalty of \$20, and if a male person be taken immediately before a justice of the peace.

If any person refuses to answer any question upon the registration card he is guilty of an offence and liable to a fine of \$100.

A wilfully false or misleading answer to any question is liable to bring a \$500 fine and imprisonment for six months.

The registrars are all enjoined to assist the public in every way possible and to treat them with courtesy and patience.

Local and General

The U.F.A. are having a big Membership Drive and will hold a meeting on Thursday evening, June 27th at 8 p.m. in the I.O.O.F. Hall. Jos. Stauffer, of Olde, will address the meeting on behalf of the U.F.A. Mrs. Root will represent the U.F.W.A., and Mr. Molyneux the U.G.G.

For Sale.—Pansy and Iceland Poppy Plants, 25c per doz. Leave orders at Chronicle Office.

See Dr. M. Mecklenburg, the old reliable graduate, long experienced, and highly qualified Eye Sight Expert about your eyes. He will again be at Crossfield on July 13th, from 9 till 2 p.m., and at Crossfield from 2 till 8 p.m. Fees are moderate.

Tirpitz on Robbery

According to the Cologne People's Gazette, Admiral von Tirpitz, addressing a meeting of the Fatherland Party of Cologne said: "As soon as England's robbery of ships ceases because there are no more to rob, England will speedily feel the full intensity of the U-boat war. Unfortunately the U-boat war has not received sufficient political support. We shall, however, hold out longer than England, and victory cannot escape us if we tenaciously pursue our aim."

He concluded that the Belgians' question remained the pivot of the war.

How's This?

We offer one Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Hall's Catarrh Cure has been taken by catarrh sufferers for the past thirty years and has become one of the most widely known remedies for Catarrh. Hall's Catarrh Cure acts through the blood on the mucous surface, expelling the Poisons from the blood and healing the diseased parts.

After you have taken Hall's Catarrh Cure for a short time you will see a great improvement in your general health.

Corn in Plenty

Ship Over All the Wheat There Is and Rely Upon Corn

Canadians probably do not realize the extent to which wheat is being saved in the United States. It is not a case over there of an occasional wheatless meal; but every effort is being made to induce the nearest possible approach to total abstinence. In a recent statement by the federal food board, the American public was urged to depend wholly upon corn, which is now available in large quantities. "It is believed that during the last eighteen months the milling capacity for corn flour has increased 500 per cent," the board declares. "If the American people would give up wheat flour entirely there would be an abundance of cornmeal, with what corn flour is available, to care for all our needs until the next harvest." Corn cannot be successfully shipped to Europe for consumption by the people and the armies; therefore, the proposal of the U. S. food board is, in effect, to ship over all the wheat there is and rely upon corn. While there is corn in plenty there will be no famine in the land.

Spend or Die!

The Price Which We are Paying to Save Our Country

In the house of commons, Mr. Bonar Law moved a vote of credit for £600,000,000. That, to quote Mr. Hopkinson, is "a bit of money." It is so much that the ordinary man, used to counting the change of a pound, cannot realize what it means. This gigantic vote is required to meet a daily war expenditure of nearly seven millions. This is the price which we are paying to save our country and our families from the Germans. The price is heavy, but, as the Rev. W. B. Hanks said yesterday: "If they got here you would have as much use for your money as Dixie had for his in hell!" It is no good, therefore, guessing at the ultimate economic effect of our tremendous spending. We have to spend or die. Freedom, social progress, decent labor conditions, all will go unless we smash the power of Prussian militarism.—London Daily Express.

TEETHING TROUBLES

Baby's teething time is a time of worry and anxiety to most mothers. The little ones become cross; peevish; their little stomachs become deranged and constipation and colic sets in. To make the teething period easy on baby the stomach and bowels must be kept sweet and regular. This can be done by the use of a reliable medicine. The Canadian doctor, Dr. Williams' Medicine Co., has a medicine for this purpose. It is called "Baby's Tablets" and cures many babies of constipation and makes his teething painless. The Tablets are sold in medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Welcome Hot Drinks

A Y.M.C.A. shelter is maintained just below the Front, from which more than sixty thousand steaming cups of hot tea, coffee and cocoa are served daily to the poor, the homeless and the hungry. The line in the area occupied by the Canadian Red Cross is estimated to be for these drinks for eight months is placed at \$48,000.

Have a Good Complexion! The Flower of Good Health

The true secret of complexion lies in the blood. Keep it rich, pure, nutritious, and above all, keep the system regular. No aid to complexion compares with Dr. Hamilton's Pills. They tone and enrich the blood, clear the system of waste products, promote good digestion, and in short, establish sound health, which, after all, is the key to all happiness and well-being. Don't delay; the charm of a lovely complexion and the reassurances of health are yours, once you employ this old-time family remedy. All dealers sell Hamilton's Pills in 25c boxes.

A Soldier's Chances

Some Interesting Statistics Based Upon Investigations

The military hospital commission at Quebec has kept an account of how Canadian troops fared in the war, and has compiled some interesting statistics based upon its investigations.

Addressing Canadian mothers and fathers the commission says:

If your boy goes to the front:

He has 29 chances of coming home to one chance of being killed.

He has 98 chances of recovering from a wound to two chances of dying.

He has only one chance in 500 of losing a limb.

He will live five years longer because of physical training.

He is free from disease in the army than in civil life.

He has better medical care at the front than at home.

In other wars from 10 to 15 men died from disease to one from bullets.

In this war one man died from disease to every ten from bullets.

This war is proportionately less wasteful of life than any other in history.

Only 10 per cent. of all Canadians disabled for further service have been physically unable to engage in their former occupations.

If your boy is one of the ten per cent. the government will re-educate him in another vocation at which he can earn a living.

This doesn't mean that war is a danger-free occupation, and that life in the trenches is as comfortable as in the easy chair here at home, but it does mean it's a lot less fearful than it has been painted over seas, especially by the German propagandists, disloyal pacifists and German-born traitors in Canada.

PUTNAM'S FINE FOR CORNS THAT ACHE

Even a drop or two of Putnam's Extract will relieve the stinging and sore corn. Mighty aching Putnam's does on a crusty old corn. You use Putnam's and the corn up and quickly, transforms it to a bunch of dead skin, loosens it from the toe so you can pick it off, roots and banishes it, with your fingers. It's painless—that is why Putnam's is so popular. It does really cure quickly—that's why you should take a quarter to the drug store today and get a bottle of Putnam's Extract.

Friends Fought In Mine Crater

Convinced That He Was Chasing a German

During a pitch black night a Canadian officer, feeling his way back to his lines, slipped into a mine crater. He didn't go down, or he would have been drowned in slush and mud. As he was trying to get back he was aware that he was not alone. On the edge of the crater—probably forty feet in diameter—he could just make out a man's figure in front of him. He crept forward the other side of the crater. The officer was convinced that he was chasing a German and opened fire with a revolver. Round and round the circular, slushy slope they rushed, until at last the Canadian officer slipped dangerously and uttered the usual swear words. Immediately a good Canadian accent rang out from the other side. "Who the— are you?" "Oh, I'm So-and-so, of the— regiment!" These two men from the same regiment, quite good friends, had been chasing each other around that crater like a couple of cats for nearly half an hour.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to thousands of children, who, but for the good offices of this superior compound, would have continued weak and enfeebled.

"Cop" Imperturbability

Steeles Were Going Up and Bombs Coming Down

A correspondent tells the following story in the Westminster Gazette, illustrating the imperturbability of the London police during air raids:

In one of the earlier raids a rattled little man rushed out of a house in his pyjamas and bedroom slippers while a Zeppelin was overhead with all the searchlights on it, and shells were going up and bombs coming down.

He stumbled up to a stalwart policeman who was standing quite unmoved at the corner of the street, and with his teeth chattering, pointed upwards and said: "A Zeppelin—Zeppelin—Zeppelin!"

The policeman drew himself up, gazed calmly at the culprit for a full minute, and then remarked slowly: "Ostle aircraft in my judgment."

And the little man hunched up his pyjamas and went back to bed.

Minard's Liniment Lumberman's Friend.

Impiled Character

A local draper tells a story of a young man from Llanpumpnant who went to London to obtain a berth.

"Ah!" said the prospective employer, "what is the meaning of Llanpumpnant?"

"The Land of Five Saints," was the reply.

"Are there five saints there now?"

"Not now, sir; only four."

The young man got the berth.—Reading (Eng.) Standard.

Germany and the Baltic

Germany Would Try To Change International Status of the Baltic

If the German coast line is pushed northward to the Gulf of Riga or beyond, the international status in the Baltic is bound to be greatly affected, but whether Germany would close "the Northern Dardanelles" of doubtful enough. She would have to make an agreement for this purpose with the three Scandinavian countries or forcibly annex territories at the Baltic entrance. Even so, an outlet might still be left by way of Archangel and Alexandrovsk. Also, a certain amount of traffic in non-bulky goods which could afford high freight rate might be continued by way of Sweden and Norway by rail round the north of the Gulf of Bothnia. There is no doubt, however, that if Germany could succeed in making the Baltic a mere clausum, a shrewd blow might be dealt at the most ancient of our English trades. The allies, however, have a very strong economic position as against Germany, and should be able effectively to counter check and such designs as these. Certainly Sweden may be expected to say a word, perhaps a strong word, about this conversion of the Baltic into a German lake.—Westminster Gazette.

They Cleanse While They Cure—

The vegetable compounds of which Farmette's Vegetable Pills are composed, mainly dandelion and manuka, clear the stomach and intestines of dangerous matter and store the deranged organs to healthful action. Hence they are the best remedy for indigestion available to-day. A trial of them will establish the truth of this assertion and do much to convince the sinner that anything that can be written of these pills.

Saved the Day

Determined to Hold on to the Advanced Line at All Costs

"By his prompt and decisive action and complete disregard of danger he inspired his men with confidence and it had not been for this plucky decision and courageous determination on his part the whole of the British army would have had to be abandoned." The hero of this striking official tribute is Second Lieutenant W. H. Moberly, Oxfordshire and Bucks Light Infantry. In an advance against enemy positions all three company commanders had been killed, and the troops on both flanks had failed to reach their objectives. Communications with battalion headquarters failed, as runners were unable to get through the machine gun and sniper fire from the front and flanks. In these circumstances this officer determined to hold on to the advanced line at all costs, and by defending his flanks and organizing an effective resistance to counter-attacks he saved the situation." Second Lieutenant Moberly has now received the D.S.O.

No man or woman should hobble painfully about because of corns when to certain a relief is at hand as Holloway's Corn Cure.

Gratified

Artist—Now, I want you to give me your candid opinion of my latest picture, old chap.

Friend—My dear boy, it's quite worthless!

Artist—Yes, I know that, but I'm dying to hear it all the same.—The Ghost.

At the Yarmouth Y.M.C.A. Boys' Camp, held at Tuskett Falls in August, I found MINARD'S LINIMENT most beneficial for sun burn, an immediate relief for colic and toothache.

ALFRED STOKES,

ANNOUNCING A NEW

MODEL "F.A."

"Baby Grand" Touring Car

The demand for Chevrolet performance in a larger and more powerful car is met by the Baby Grand Touring Car. Chevrolet engineers have, in this car, perfected many new features that give it a quick get-away, surplus power on hills, and reliability under all road conditions.

On account of its power, flexibility, comfort and easy clutch, this model appeals to lady drivers. The car is extremely well finished, nicely appointed and fully equipped.

EXCLUSIVE FEATURES

37 H.P. 4 cylinder valve-in-head motor, extremely powerful, smooth, flexible and efficient.
Cooling—Water circulated by centrifugal pump through large honeycomb radiator.
Clutch—Cone type, extremely easy to operate.
Brakes—Positive in action and easily operated.
Rear Springs—Semi-cantilever, making the "Baby Grand" one of the most comfortable riding cars.
Rear Axle—Three-quarter floating type with spiral driving gears.
Starting and Lighting—Electric Auto Lites.
Ignition—Remy.

Standard Drilling Rigs Now Ready to Pound Their Way Into The Oil Sands

Warm Springs—Wyoming

Already one of the big producing fields of Wyoming. Eight wells have been completed and fortunate stockholders are drawing big dividends every month in the year. This is a "shallow" field and the drilling cost is at a minimum. Through a peculiar turn of fortune the Van Duzen Co. was able to secure a valuable lease on this structure. At least a dozen companies are now drilling towards the oil producing sands in the Warm Springs Dome and we do not expect to lose much time in starting our operations there. Remember this is a producing field.

Sundance-Upton Fields—Wyoming

We were in this field before the boom started and have 6,000 acres under lease on the very apex of the structure. This dome bids fair to be one of the best fields in Wyoming and our large acreage will always make us the big company of this field. We have one rig spotted in this field.

Salt Creek—Wyoming

This is the most consistent oil producing field in all the world, and although the field is but five years old, it has made more wealthy people than any of the big fields of Wyoming. The wide-awake men who are at the head of this company have secured 520 acres of land less than a half mile from one of the largest gushers in the field. One 500 barrel well in this field at \$1.00 per barrel would mean more than 20 per cent per annum on the total capitalization of the Van Duzen Oil Co. We have room for 64 wells on this property.

The Crazy Woman's Pocket—Montana

This dome has been recognized by many geologists to be the most perfect structure for an oil reservoir in all of America. Two other companies have wells in the process of completion on this dome, and it is reported that one of them has already encountered an oil producing sand. The Van Duzen Oil Co. has secured 560 acres of deeded land lying midway between the two wells now drilling. Our derricks are now in the course of construction. When this field is proven it will be the first producing field in Montana. Boom prices will prevail and our stock is sure to go sky high.

Powder River Junction—Wyoming

We have a one-third locator's interest in three one-quarter sections lying within a quarter of a mile from a well now being drilled by the famous Ohio Oil Co. This dome is looked upon as being one of the coming fields of the state. Shallow drilling and its proximity to rail transportation will make this field a big dividend payer.
